New York, 10278-0090

Re: Cornell-Dubilier Electronics Superfund Site
Operable Unit 1 - Soil Remediation
Remedial Action Report Approval

Dear Mr. Roos:

The U.S. Environmental Protection Agency (EPA) has completed its review of the Soil Remediation Remedial Action (RA) Report dated May 2015, for the Cornell-Dubilier Electronics Superfund site. The RA Report was prepared by the U.S. Environmental Protection Agency and the Kansas City District Corps of Engineers with support from the Louis Berger Group, Inc. and Severson Environmental Services under contract with the New York District Corps of Engineers. The RA Report adequately documents that the remedial action objectives have been met. Based on this review, EPA hereby approved the Operable Unit 1 - Soil Remediation RA report.

If you have any questions regarding this matter, please call Diego Garcia of my staff at 212 637-4947.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "Carole Petersen", is written over a horizontal line.

Carole Petersen, Chief
New Jersey Remediation Branch
